

By Force of Thought

Irregular Memoirs of an Intellectual Journey

Endorsements

"This book provides insightful accounts of the turbulent institutional transformations in Hungary and of the evolution of contemporary economic thought--both of which the author himself has been actively engaged in. It may also be read as a treatise on the ethics and psychology of scientific creation by a leading social science scholar of our time."

--Masahiko Aoki, Professor Emeritus, Stanford University, and President-Elect, the International Economic Association

"Janos Kornai understands the way the socialist economy works better than anybody else in the world. His *Economics of Shortage* was for me and my associates in Russia a book of great importance. *By Force of Thought* offers a detailed look at how Kornai's life and thought developed."

--Yegor Gaidar, Director, Institute for the Economy in Transition, Moscow
